

Key:

- Highlighted Name:** A name highlighted in a box indicates that the individual is a member of the Natural Person Basic project.
- Weighted Edge:** A thicker line indicates a stronger relationship between two individuals.
- Directional Edge:** A line with an arrowhead indicates a directed relationship (e.g., influence or communication).
- Undirected Edge:** A simple line indicates an undirected relationship.
- Dashed Edge:** A dashed line indicates a relationship that is less certain or inferred.
- Weighted Directed Edge:** A thick line with an arrowhead indicates a strong, directed relationship.
- Weighted Undirected Edge:** A thick simple line indicates a strong, undirected relationship.
- Dashed Directed Edge:** A dashed line with an arrowhead indicates a weak or inferred directed relationship.
- Dashed Undirected Edge:** A dashed simple line indicates a weak or inferred undirected relationship.

Notes:

- The diagram is based on data from the Natural Person Basic project, which is a collection of public records and information about individuals.
- The relationships shown are based on publicly available information and may not represent all possible connections.
- The diagram is a simplified representation of a much larger and more complex network.
- The central hub represents a highly influential individual or a group of individuals with many connections.
- The periphery represents individuals with fewer connections or less influence.
- The thickness of the lines represents the strength of the relationship, with thicker lines indicating stronger connections.
- The direction of the lines represents the nature of the relationship, with arrows indicating the direction of influence or communication.
- Dashed lines represent relationships that are less certain or inferred from the data.
